**Recommended citation:** KNBS 2023. Statistical Abstract 2023. Nairobi, Kenya.

The Statistical Abstract is published annually by the Kenya National Bureau of Statistics; Nairobi. It is a single source of data covering a series of 5 years or more from year of publication. The Abstract enables any information seeker to get complete time series data of the Kenyan Economy from one SINGLE official source.

The current Abstract therefore contains a comprehensive set of information that is useful for any form of analytical work.

Any enquiries relating to this publication should be addressed to the Director General, Kenya National Bureau of Statistics, Real Towers, Upper Hill along Hospital Road. Subscription correspondence may be addressed directly to the Head Librarian in the same building.

The abstract is a single source of data covering a series of 5 years or more from year of publication. It enables any information seeker to get complete time series data of the Kenyan Economy from one SINGLE official source

# Kenya National Bureau of Statistics

## Vision

To be a global leader in the provision of quality statistical services.

## Mission

To provide, manage and promote quality statistical services through utilization of best practices for evidence-based decision making.

## Core Values

The Bureau is committed to upholding values of Professionalism, Integrity, Confidentiality, Customer focus, Innovation and Team work (PICCIT) as the guiding principles in production of statistics.

## Organization of KNBS

The management of the Bureau is vested in The Board of Directors, The Director General is the Chief Executive Officer of KNBS and Secretary to the Board.

Kenya National Bureau of Statistics further comprises of five Directorates namely;

- Production Statistics
- Statistical Coordination and Methods • Macroeconomic Statistics
- Population and Social Statistics
- Corporate Services

## Mandate

To collect, analyze and disseminate statistical information. The Bureau is also the custodian of official statistical information, and coordinator of the National Statistical System.

## Introduction

This Abstract has been prepared by the Kenya National Bureau of Statistics. The tables have been compiled partly from statistics collected directly by the Bureau through Surveys and Censuses and also from statistics compiled by other Ministries, Departments and Agencies (MDAs) including county Governments. The source of the statistical data is shown under each table.

The Kenya National Bureau of Statistics is also responsible for the preparation of the Economic Survey and Leading Economic Indicators in which emphasis is placed on current statistics for which monthly and quarterly series are available. In addition, reports are published on the various regular and ad hoc statistical surveys undertaken by the Bureau.

Whereas these publications aim at providing statistical coverage of the important fields of economic, financial and social activity in Kenya, the published material may not meet detailed requirements of all users.

Additional information, whenever available, will be supplied by the Bureau on request, although in certain circumstances, depending on the amount of work involved in extracting the required particulars, it may be necessary to make a charge.

**The Kenya National Bureau of Statistics is responsible for the preparation of the Economic Survey and Leading Economic Indicators in which emphasis is placed on current statistics for which monthly and quarterly series are available. In addition, reports are published on the various regular and ad hoc statistical surveys undertaken by the Bureau.**

The statistics published in the Statistical Abstract reports are based on a wide variety of sources including own surveys and censuses, studies carried out by other institutions and administrative data collected by Ministries, Departments and Agencies; County Governments; and establishments. The sources of data are always recognized

**Data Quality Declaration:** The Statistical Abstract report is an annual publication prepared by the Kenya National Bureau of Statistics that provides socio-economic statistical information covering a five-to eight-year period.

**Data Sources:** The statistics published in the Statistical Abstract reports are based on a wide variety of sources including own surveys and censuses, studies carried out by other institutions and administrative data collected by Ministries, Departments and Agencies; County Governments; and establishments. The sources of data are always recognized.

**Accuracy and Reliability:** All censuses and surveys conducted by the Bureau are based on international standards and methods. Sampling and non-sampling errors that may occur in a census or survey are always disclosed. Data from administrative sources are subject to international best practices on statistics and are verified and validated through sectoral Technical Working Groups.

**Periodicity:** Although the Statistical Abstract report is an annual publication, data may also be presented on quarterly and monthly basis for the review period.

**Consistency:** The Bureau maintains a compendium of statistical definitions. The Bureau has endeavored to provide the same format of statistical tables as in previous years to enable consistency and trend comparison over time.

**Accessibility:** KNBS reports are disseminated by various platforms including publications accessible from the KNBS Library, open data portals and website: [www.knbs.or.ke](http://www.knbs.or.ke), press releases and social media.

**Timeliness:** The report is produced annually, by the end of November of the review year.

# Constitution of Kenya

Kenya's current constitution was enacted on 27th August 2010 replacing the previous one that had been in place since Kenya's independence in 1963. It provides the Structure of Government of Kenya to consist of the Executive, Legislature, Judiciary and Devolved Governments.

## The Executive

The President, the Deputy President, and the cabinet constitute the executive arm of the Kenyan government. The President is the Head of State and Government, Commander-in-Chief of the Kenya Defense Forces, and the Chairperson of the National Security Council.

The President is elected directly by all registered voters for a five-year term. For a person to be declared winner of the presidential vote, the candidate must receive more than 50 per cent of the total votes cast, plus at least 25 per cent of the votes cast in more than half of the counties. One can only serve as president for a maximum of two terms.

The Deputy President is the President's principal assistant. During the presidential election, each presidential candidate nominates a running mate. Upon election, this running mate becomes the Deputy President. The cabinet comprises of the President, the Deputy President, the Attorney General, and 14 to 22 cabinet secretaries. The President appoints the cabinet secretaries, but the appointments must be approved by the National Assembly.

**NOTE:** In the Constitution 2010, Cabinet Secretaries are appointed from outside Parliament and the President and the Deputy President are no longer Members of the Parliament.

## The Legislature (Parliament)

As per Article 93 of the Constitution 2010, the Parliament consists of the National Assembly and the Senate with membership of 418 including the speakers of the two Houses.

### (a) The National Assembly

Article 97 of Constitution of Kenya provides for the membership of the National Assembly comprising of the Elected and nominated Members as follows: Ex-officio- Speaker: 1

Elected Members from single Member Constituency: 290

Elected Women from each County Constituting a single member Constituency: 47

Nominated Members: 12

<sup>1</sup> The National Assembly consists of twelve members nominated by parliamentary political parties according to their proportion of members of the National Assembly in accordance with Article 90, to represent special interests including the youth, persons with disabilities and workers.

### (b) The Senate

Article 98 of the Constitution provides for the membership of the Senate consisting of the elected and nominated Senators as follows:-

Ex-officio- Speaker: 1

Elected Senators from each of the 47 Counties: 47 Nominated Women Senators: 16

**Nominated Senators (one man and woman) representing the youth: 2**

**Nominated Senators representing persons with disabilities: 2**

## The Judiciary

The Constitution creates an independent judiciary consisting of the courts of law and tribunals. The Chief Justice is the head of the judiciary, and is appointed by the President on the recommendation of the Judicial Service Commission. This is subject to the approval of the National Assembly.

Under the Kenya constitution, the Supreme Court is the highest court in Kenya. The Chief Justice is the President of the Supreme Court. This court also comprises the Deputy Chief Justice and five other judges.

The Court of Appeal is the second highest court in Kenya. It comprises of at least 12 judges and is headed by a President of the Court of Appeal. The court only has appellate jurisdiction over appeals from the High Court and other courts and tribunals.

The third highest court in Kenya is the High Court. The High Court has unlimited original jurisdiction in criminal and civil matters. The court also has supervisory powers over the subordinate courts.

The constitution mandates Parliament to establish special courts to determine disputes related to employment and labour relations, land and environmental matters. These special courts have equal status with the High Court. The High Court does not have any jurisdiction over matters handled exclusively by these special courts.

## The Devolved Governments

The Constitution establishes 47 counties, each with its own government. County governments consist of a county assembly and a county executive. The county assembly is made up of members elected from different wards in the county. The Governor is the head of the county executive. Voters in each county elect their governor and deputy governor directly. The Governor then appoints other members of the county executive committee, with the approval of the county

**The Constitution establishes 47 counties, each with its own government. County governments consist of a county assembly and a county executive. The county assembly is made up of members elected from different wards in the county. The Governor is the head of the county executive. ## Land and Lakes

### Notes

#### Land and Water Area

Statistics on land area and the area under inland water, coastal water bodies and inter-tidal areas is important because human activities are the main drivers of change in land cover. Land area is a country's total area excluding area under inland water bodies and exclusive economic zones. The total surface area is about 610,000 square kilometres comprising of land area (580,609 sq.km), water area (11,362 sq.km.) and terrestrial water area (18,029 sq.km). The largest counties in size are Marsabit, Turkana, Wajir, Garissa, Tana River, Isiolo and Kitui while the smallest ones are Mombasa, Vihiga, Nairobi City, Nyamira, Kirinyaga, Kisii and Busia.

#### Lakes, Mountains and National Parks

Kenya has a large number of fresh water and salt water lakes with a total area of about 10,839 square kilometres. Lake Turkana is the largest lake in the country with a surface area of 6,405 square kilometres followed by Lake Victoria. Lake Nakuru, Bogoria and Elementaita are the most important salt water lakes in the country for their environmental and historic richness. Major mountains include; Aberdare Ranges, Mount Kenya, Mau Escarpment, Mount Elgon and Cherangani Hills. Mount Kenya is the tallest mountain followed by Mount Elgon. Kenya's national parks and reserves occupy an area of 29,648 square kilometres with Tsavo national park being the largest with an area of 20,430 square kilometres.

**Land area is a country's total area excluding area under inland water bodies and exclusive economic zones. The total surface area is about 610,000 square kilometres comprising of land area (580,609 sq.km), water area (11,362 sq.km.) and terrestrial water area (18,029 sq.km).**

## National Accounts

### Notes on Compilation of National Accounts

In Kenya, national accounts are compiled in line with the international guidelines of the United Nations' System of National Accounts of 2008 (the 2008 SNA). The constant prices are measured using 2016 (base year) prices.

The current estimates resulted from revision and rebasing of the national accounts from 2009 base year to the current 2016 base year. The revision process was undertaken with the view of ensuring the statistics, in terms of concepts and definitions followed the 2008 SNA guideline as closely as possible.

#### Scope

The scope of the national accounts majorly meets the recommendations of the 2008 SNA. The following is part of what is compiled on regular basis (annually):

- value added by activity (current and constant prices)
- expenditures on GDP (current and constant prices)
- value added components by activity (current and constant prices)
- production and generation of income accounts (for total economy and also by activity)

The revision process involved estimation and inclusion of output of some activities in underground economy. At

the moment, the following SNA recommendations are not included; illegal output; trade in illicit drugs, illegal weapon trafficking etc.

#### Classification

Classification of transactions as recorded in the accounts broadly follows the 2008 SNA. Classification of economic activities and products has been done according to ISIC rev. 4, but there are a few deviations. The COICOP is used for classifying household final consumption expenditures.

Transaction	Valuation
Flows and stocks	Market prices
Market output	Basic prices
Output for own-use	Market prices
Non-market output	At cost of production
Imports	Free on board (f.o.b)
Exports	Free on board (f.o.b)

The term "mixed income" is used for the surplus generated by unincorporated household enterprises ("Jua kali" or informal sector activities). The reason is that surplus generated by such enterprises includes both remuneration for the labor of the owner and a return to the entrepreneurship and capital employed

Recording is done on accrual basis except for the government's accounts which are on cash basis. Work-in-progress is recorded in the period when it is produced.

The production account has been split into two – the production account and the generation of income accounts. The contribution to the Gross Domestic Product (GDP) by a producer – its value added – is derived in the production account, while the components of value added are recorded in the generation of income account. The components of value added are taxes on production and imports, compensation of employees and operating surplus/mixed income. In the current series, production and generation accounts are compiled separately for general government.

The term "mixed income" is used for the surplus generated by unincorporated household enterprises ("Jua kali" or informal sector activities). The reason is that the surplus generated by such enterprises includes both remuneration for the labor of the owner and a return to the entrepreneurship and capital employed.

The 2008 SNA has further clarified and slightly extended the production boundary through defining all own-account production of goods by households, cultivated natural products, and production from illegal activities as output. However, in practice it is very difficult, if not impossible, to measure production from illegal activities.

The 2008 SNA makes it clear that the economic territory of a country must also include economic free zones that are exempt from taxes and customs duties. Thus, Kenya's Export Processing Zones are included in the calculation of GDP and no exports to or imports from the Zones are recorded.

Taxes on products include the excise and import duties, the road maintenance levy, the insurance premium tax and the value added tax. Other taxes on production consist of taxes on the ownership of land, buildings or other assets used in production or on labor employed. In Kenya, this includes various business or professional licenses to the central government and rates, licenses and cesses to the local authorities.

Value added is valued at basic prices as follows:

Gross value added at basic prices = Output at basic prices - Intermediate consumption at purchasers' prices

Basic prices exclude any taxes payable on products and include any subsidies receivable on products while purchasers' prices include such taxes as well as trade and transport margins.

Factor cost is not favored by the 2008 SNA, nevertheless, it can still be computed as:

*Gross value added at factor cost= Gross value added at basic prices - Other taxes on production + Subsidies*

In practice, however, the difference between factor cost and basic prices is negligible because other taxes on production constitute a very small proportion of taxes in Kenya.

As was the case with the 1993 SNA, the 2008 SNA defines only GDP at market prices and does not make any reference to GDP at factor cost. In order to derive the GDP at market prices, taxes less subsidies on products must be added to total gross value added at basic prices. Thus,

GDP at market prices is derived as:

GDP at market prices=Sum of gross value added of all economic activities at basic prices + Taxes on products - Subsidies on products

Gross national income (GNI) replaces gross national product (GNP). The rationale behind the change is that this aggregate is a concept of income rather than a concept of production.

In the revised national accounts, FISIM is calculated according to the 2008 SNA with separate estimates of FISIM on loans and deposits as follows:

**FISIM on loans** =  $L \times (RL - RR)$

**FISIM on deposits** =  $D \times (RR - RD)$

**Total FISIM** = FISIM on loans + FISIM on deposits

Where;

**L** = stock of loans;

**D** = stock of deposits;

**RL** = interest rate on loans;

**RD** = interest rate on deposits;

**RR** = reference interest rate (the "SNA-interest")

The interest rates on loans and deposits have been derived as the implicit rate (interest payable/receivable divided by stock of loans/deposits). The reference rate has been calculated as the average of the interest rates on loans and deposits.

There is no recommendation for deflation of FISIM3, and the approach used in the Kenya national accounts is to deflate current price values with the CPI4 all items.

Key additions as per the recommendations of the 2008 SNA include; adoption of work-in-progress technique in crops, livestock and construction; compilation of estimates of research and development (R&D); recommendation for the calculation of the output of banks and insurance companies; and military expenditures.

#### Base Year

In order to analyse the behaviour of the GDP over time independently of the influence of price changes, calculations are made at constant prices. In loose terms, constant price measures inform about the volume of goods and services produced, independent of changes in prices.

The GDP series at constant prices are calculated by selecting a reference period, called the base year, and valuing current supply of goods and services in the prices of that year. The base year for the national accounts estimates at constant prices is 2016.

#### Commodity Flow

A systematic commodity flow technique is largely employed in the compilation of national accounts estimates. This technique entails a systematic confrontation of supply and use data for products at as detailed a level as possible.

The format is as follows:

+Output at basic prices

+Imports

+Trade and transport margins

+Taxes on products

= Total supply at purchasers' prices

+Intermediate consumption  
+Final consumption expenditure  
+Gross fixed capital formation  
+Changes in inventories  
+Exports

= Total use at purchasers' prices

Separate commodity flows are compiled for output from domestic producers and for imports. A commodity flow is attached to each production account at the most detailed level and output is allocated to the use categories listed above except that changes in inventories are not estimated. Exports are available from the foreign trade statistics (goods) and the balance of payments (services). The allocation of supply for domestic use to final and intermediate consumption is often guided by the nature of the products produced.

Separate commodity flows have been compiled for imports of goods and services. The allocation of goods to uses is based on the classification of imports by Broad Economic Categories, which approximately identifies goods for intermediate consumption, goods for final consumption and capital goods.

Margins and taxes on production are added to calculate uses at purchasers' prices. Information on taxes – tax rates and total tax income by category – is available while the estimates of margins are based on reasonable assumptions.

#### GDP by Activity

GDP is calculated from the production side as the sum of values added.

#### General Government

General government comprises National government

Non-Market Public corporations  
County governments

#### Social security funds

Non-market producers form the major part of general government. They produce services that are supplied free or at prices that are not economically significant. In general, there are no suitable market prices for this kind of services, and the output is valued as the sum of its costs of production. Thus;

+Intermediate consumption  
+Compensation of employees  
+Consumption of fixed capital

+Other taxes on production  
= Gross output

Largely, government producers are considered non-market producers with output calculated as explained above. Consumption of fixed capital is calculated in total for general government and allocated to the major economic activities (ISIC-categories).

The source data from government financial statistics are on a cash basis. This is used as an approximation of accrual data assuming that the difference between cash and accrual recording is fairly stable. The financial year for general government ends on June 30. Calendar years are calculated as the average of two financial years.

Largely, government producers are considered non-market producers with output calculated as explained above. Consumption of fixed capital is calculated in total for general government and allocated to the major economic activities (ISIC-categories)

## Labour

### Notes, Definitions and Coverage

**M**ost tables in this section have been derived from the Annual Enumeration of Employees and Self-employed Persons, whose reference is 30<sup>th</sup> June of every year. The annual wage bill is estimated from monthly data this is done by annualizing the reported earnings for the month of June.

Wage employment figures as shown in this section may not compare with those shown elsewhere in the Abstract, e.g. in the Industrial Statistics. This is due to differences in coverage, timing, etc. between the annual enumeration of employees and the other enquiries in which information on employment is also collected.

Public services include: National Government, Parastatal Bodies, and County Governments.

All public and formal private establishments provide information on main activity which forms the basis for industrial classification.

Wage employment figures include casual employees, part-time workers, directors and partners serving on a regular basic salary contract. Self-employed persons and

family workers who do not receive regular wages or salaries are excluded. Employment in the informal sector of the economy is not included in this Chapter. Also excluded are employment figures for rural small-scale agriculture and pastoralists activities.

Earnings or wages cover all cash payments, including: basic salary, cost of living allowances, profit bonus, together with the value of rations and free board, and an estimate of the employer's contribution towards housing.

Earnings as shown in this section are lower than the estimate of factor income going to employees because they exclude: pensions, employers' contributions to the National Social Security Fund or private provident funds and personal emoluments for the armed forces. Earnings in informal sector, rural small scale agriculture and pastoralists activities are excluded.

The economic classification used in this chapter is a domesticated version of the United Nations' 4-digit International Standard Industrial Classification of All Economic Activities (ISIC Rev 4).

**Wage employment figures include casual employees, part-time workers, directors and partners serving on a regular basic salary contract. Self-employed persons and family workers who do not receive regular wages or salaries are excluded**

## Size distribution of establishments

**Table 3.1:** Number of Employees<sup>1</sup> by Industry and Employment Groups, 2022

Activity/Employees	<5	5-9	10-19	20-49	>49	Total
<b>Agriculture, Forestry and Fishing</b>						
Growing of beverage crops (Coffee)	-	570	3,284	7,766	62,710	74,330
Growing of beverage crops (Tea)	-	-	-	3,277	79,383	82,660
Growing of sugar cane	-	-	920	2,499	28,302	31,721
Growing of fibre crops (Sisal)	-	-	-	-	14,772	14,772

## RETAIL PRICES AND CONSUMER EXPENDITURE

### Notes and Definitions

(a) Table 3.16 (a) presents the weights used for the Kenya Consumer Price Indices derived from the 2005/06 Kenya Integrated Household Budget Survey (KIHBS). This old CPI had a base period of February 2009=100 and were compiled and published from February 2009 to January 2020. Nairobi Lower Income CPI was designed to measure changes in retail prices of goods and services consumed by households with monthly income of up to KSh 23,671 per month. Middle income ranged from KSh 23,671 to KSh 120,000 while upper income were households with income of over KSh 120,000. Rest of Urban areas refer to those urban areas representing each of the regions outside Nairobi.

(b) Table 3.16 (b) presents the weights used for the Kenya Consumer Price Indices derived from the 2015/16 Kenya Integrated Household Budget Survey (KIHBS). The new CPI has a base period of February 2019=100 and has been compiled and published from March 2020. In the new CPI, Nairobi Lower Income constitute households with monthly income of up to KSh 46,355 per month. The Nairobi Middle Income ranges from KSh 46,356 to KSh 185,394 while Nairobi Upper Income constitutes households with income of over KSh 185,395. The Rest of Urban areas refers to those urban areas representing each of the regions outside Nairobi.

**Table 3.16(a): Group Weights for Kenya CPI Based on KIHBS 2005/06**

(Base period : February 2009=100)

Description	Lower	Middle	Upper	Rest of Urban Areas	All Kenya
Food and Non-Alcoholic Beverages	42.535	22.015	6.974	35.876	36.038

## Money, Banking and Finance

### Notes and Definitions

#### Expanded Coverage in the Compilation of Monetary and Financial Statistics

In 2022, the compilation of monetary and financial statistics was revised in line with international guidelines outlined in the IMF's Monetary and Financial Statistics Manual and Compilation Guide, 2016. Previously, statistics only included data from the Central Bank and commercial banks in the Other Depository Corporations (ODC) survey.

Developments in the financial sector over time have led to the expansion of other deposit-taking financial institutions such as Micro-Finance Banks (MFBs) and Deposit Taking Savings and Credit Cooperatives (DT SACCOs).

The expanded data coverage includes the Central Bank of Kenya, 39 commercial banks, 1 mortgage finance company, 176 deposit taking saccos and 14 microfinance banks.

Monetary and Financial Statistics Broad Subsectors and Institutions Covered as illustrated on the right.

Sub-sector	Institutions
1.	Central Bank
2.	Deposit taking institutions, commonly referred to as Other Depository Corporations (ODC)
3.	The non-deposit taking financial institutions or other financial intermediaries, commonly referred to as Other Financial Corporations (OFC).

**Developments in the financial sector over time have led to the expansion of other deposit-taking financial institutions such as Micro-Finance Banks (MFBs) and Deposit Taking Savings and Credit Cooperatives (DT SACCOs)**

**Currency:** Notes and coins of the Central Bank of Kenya.

**Commercial Banking:** The main categories of money are:-  
Narrow Money M0: Currency outside the banking system excluding commemorative coins

**M1:** comprises of currency outside banks + Demand deposits of depository corporations.

Demand deposits are subject to transfer by cashing out or cheques.

**Broad Money M2:** M1 + Quasi money deposits. (Time and savings deposits)

**Quasi money:** Includes near money. It comprises of call plus 7 days deposits, savings and time deposits.

Time deposits are usually not subject to transfer by cheque and lodged for a definite period subject to notice of withdrawal.

Saving deposits are lodged for no fixed period. Certain conditions are applicable to depositors who wish to avail cheque facilities

**Extended Broad Money M3:** M2 + foreign currency deposits

**Table 4.1:** Currency in Circulation, 2016 - 2022

## Public finance

### Notes and Definitions

The compilation of Government Finance Statistics (GFS) under Public finance, uses the GFS framework in accordance with the Government Finance Statistics Manual (GFSM2014). This Chapter highlights the overall performance and fiscal position of the general government and public sector. Some of the key concepts used include:

**Revenue:** This is an increase in net worth resulting from a transaction

**Expense:** This is a decrease in net worth resulting from a transaction

**Expenditure:** This is the sum of expense and the net investment in nonfinancial assets

**Nonfinancial assets:** These are economic assets that are not financial in nature. Nonfinancial assets are stores of value and provide benefits either through their use in the production of goods and services or in the form of property income.

**Net Leading/Borrowing:** Is the summary measure indicating the extent to which government is either putting financial resources at the disposal of other sectors in the

economy or abroad or utilizing the financial resources generated by other sectors in the economy or from abroad.

**General Government:** Consists of non-market resident institutional units that fulfill the functions of government as their primary activity and perform the principal economic functions of government. In the context of Kenya, the general government comprise of National Government (consisting of Budgeted Central Government and Extra Budgetary Units), County Government (consisting of the 47 counties) and the 3 Social Security Funds.

**Central/National Government:** Consists of the institutional unit(s) of the central government plus those non-market Non-Profit Institutions (NPIs) that are controlled by the Central Government. The political authority of the Central Government extends over the entire territory of the country.

**Budgetary Central Government:** A single unit of the Central Government that encompasses the fundamental activities of the national executive, legislative and judiciary powers.

**Extra Budgetary Units:** Non-market institutional entities with individual budgets not fully covered by the Budgetary Central Government.

**Net Borrowing:** Is the summary measure indicating the extent to which government is either putting financial resources at the disposal of other sectors in the economy or abroad or utilizing the financial resources generated by other sectors in the economy or from abroad

**Local/County Government Units:** Institutional units whose fiscal, legislative and executive authority extends over the smallest geographical areas distinguished for administrative and political purposes.

**Social Security Funds:** Government units that are devoted to the operation of one or more social security schemes

**Public Corporations:** Consist of all resident financial and non-financial corporations controlled by government units or by other public corporations and transact at economically significant prices.

**Public Sector:** Consists of all resident institutional units controlled directly, or indirectly, by resident government units. This includes all units of the General Government sector and resident public corporations.

**Debt:** A debt instrument is defined as a financial claim that requires payment(s) of interest and/or principal by the debtor to the creditor at a future date. The following instruments are debt instruments: Special Drawing Rights (SDRs), Currency and deposits, Debt securities, Loans, Insurance, pension, and standardized guarantee schemes, other accounts payable.

**Classification of Function of Government (COFOG):** This is a detailed classification of functions, of socioeconomic objectives, that general government units aim to achieve

through various kinds of expenditure. In GFS, COFOG is applied only to expenditure, comprising expense and the net investment in non-financial assets.

**Stocks:** These are the outstanding amounts of assets and liabilities at a given point in time (e.g., end of month, quarter, or year) affected by all flows since the asset or liability was first acquired.

**Nonfinancial assets:** Nonfinancial assets are economic assets other than financial assets. Nonfinancial assets may be produced or non-produced.

Financial assets: Financial assets consist of financial claims and gold bullion held by monetary authorities as reserve assets.

**Liability:** A liability is established when one unit (debtor) is obliged, under specific circumstances, to provide funds or other resources to another unit (creditor).

**Net worth:** The net worth of an institutional unit (or group of units) is the total value of assets (nonfinancial and financial) minus the total value of liabilities:

**Consolidation:** This is the process of eliminating the flows and stock positions between the subsectors of the public sector being consolidated (grouped together) to avoid double counting. It changes the aggregates without altering balancing items.

## International Trade / Balance Of Payments

### Notes and Definitions

1. **General** - All trade between Kenya and other countries is defined as external. This trade is classified under the headings of Imports, Domestic Exports, and Re-exports.
2. **Standard International Trade Classification (S.I.T.C)**  
- The United Nations Standard International Trade Classification (S.I.T.C) regularly revised and modified to cater for Kenya's needs has been used since January 1964. Currently, Kenya applies S.I.T.C Rev 4 following the successful revision of S.I.T.C Rev 3, in 2006. The S.I.T.C is more suitable for economic analysis.
3. **Direct Imports** - These are defined as goods directly imported into Kenya for warehousing. Direct Imports include Government imports and goods subsequently re-exported.
4. **Imports for Home Use:** Imports for home use mean goods: -
  - i. which on importation are cleared through Customs, plus
  - ii. released by Customs from bonded warehouses and
  - iii. entered into manufacturing plants, less
  - iv. nationalized re-exports, that is, re-export of goods originally cleared for home used but subsequently re-exported.

In some cases transfers of goods imported in a previous year, or goods transferred at a higher value than when originally imported, or transfers of goods initially imported by parcel post, may distort the relationship between quantity and value, or a value out of proportion to the quantity.

5. **Valuation of Imports** - Imports are valued at cost, insurance and freight (c.i.f) at the port or place of entry into Kenya. However, customs duty and internal handling charges are excluded.
6. **Country of Origin** - The country in which the goods were grown or produced; in the case of manufactured goods, the country in which the manufacturing process

All trade between Kenya and other countries is defined as external. This trade is classified under the headings of Imports, Domestic Exports, and Re-exports

- was substantially completed. When the country of origin cannot be determined, the goods are shown as originating in the country from which they were consigned. From 1976 imports are classified as originating from the country of last consignment.
7. **Domestic Exports** - These are defined as Kenya produce and manufactures exported to other countries or sold at aircrafts, or ships' stores. From 1976 exports and re-exports are classified as destined to the country of consignment except where such goods are consigned via another country.
  8. **Re-exports** - These consist of imported goods exported in the same form to other countries or to aircrafts, or ships' stores.
  9. **Valuation of Domestic Exports and Re-exports** - These are valued at free-on-board (f.o.b). The value includes any Kenya cess levy or export tax levied on the goods.
  10. **Country of Destination** - The country to which the goods are finally sent, as far as is known at the time of export.
  11. **Common Market for Eastern and Southern Africa (COMESA)** - The previous Preferential Trade Area (PTA) member countries comprising of: Burundi, Comoros, DRC Congo, Djibouti, Egypt, Eritrea, Ethiopia, Kenya, Libya, Madagascar, Malawi, Mauritius, Rwanda, Seychelles, Sudan, South Sudan, Eswatini (formerly Swaziland), Uganda, Zambia, and Zimbabwe.
  12. With the creation of the East African Cooperation that became East African Community, goods can easily cross the borders without Customs documentation hence not accounted in large scale trade. Information on these goods is compiled from Informal Cross Border Trade (ICBT) surveys, aggregated and included as imports and exports depending on the direction of flow.
  13. **Gold** - Import and export of gold is included in the external trade statistics.
  14. **Trade Indices** - A Paascherized - Laspeyres formula has been used and 2009 taken as the base year. Indices have been computed for Direct Imports and Domestic Exports.
  15. **Exclusions** - Travelers' samples, passengers' baggage, motor vehicles moved on a triptyque or carnet de passage de Duane, naval and military stores, duty free goods with a value of less than Sh.1,000 moved by air freight, goods in transit to neighbouring countries outside Kenya, diplomatic goods imported and exports by parcel post are excluded from the trade statistics.
  16. **BPM6** - The Sixth edition of the Balance of Payments and International Investment Position Manual. This is the current compilation manual for Balance of Payments statistics.
  17. **Current account** – shows flows of goods, services, primary income, and secondary income between residents and nonresidents.
  18. **Capital account** - shows credit and debit entries for non-produced nonfinancial assets and capital transfers between residents and nonresidents.
  19. **Financial account** - shows net acquisition and disposal of financial assets and liabilities.
  20. **Net Errors and Omissions** - shows the imbalances of Balance of Payments accounts as a result in practice from imperfections in source data and compilation.
  21. **Direct investment** - a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy.
  22. **Portfolio investment** - is defined as cross border transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets.
  23. **Other investment** - is a residual category that includes positions and transactions other than those included in direct investment, portfolio investment, financial derivatives and employee stock options, and reserve assets.
  24. **Reserve assets** - are those external assets that are readily available to and controlled by monetary authorities for meeting Balance of Payments financing needs, for interventions in exchange markets to affect the currency exchange rate, and for other related purposes such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing.
  25. **Exceptional financing** - brings together financial arrangements made by the authorities (or by other sectors fostered by authorities) of an economy to meet Balance of Payments needs.
  26. **Further Information** - More detailed definitions and notes on International trade and Balance of Payments statistics are contained in the International Merchandise Trade Statistics (IMTS) 2010 Manual and the Sixth edition of the Balance of Payments and International Investment Position (BPM6) Manual, respectively.

## Agriculture

### Notes

This section provides information on land potential, quantity, average price and value of marketed production by type of crops grown and livestock reared. It also gives information on value of farm inputs, acreage under irrigation by type of crop grown.

**Reporting period:** The data is reported on calendar year as opposed to seasonal basis. Therefore, for crops where planting and harvesting may take place more than once in the year, the production data is aggregated to get the annual data. Most production and price figures shown in the tables refer to calendar years. However, there are some instances where data published by some data providers may be on financial year basis

**Agricultural Area:** refer to area under the crop or the area harvested. For a particular crop, the area reported is on what has been harvested.

**Arable land:** Is the land under temporary agricultural crops (multiple-cropped areas are counted only once), temporary meadows and pastures (for less than five years), land under market and kitchen gardens, barnyards, and land temporarily fallow (for less than five years). The abandoned land resulting from shifting cultivation is not included in this category. Data for "Arable land" are not meant to indicate the amount of land that is potentially cultivable.

**Crop production:** Refers to the actual harvested production from the field and excludes threshing losses and that part of crop not harvested for any reason.

**Livestock Primary Products:** include products from live and slaughtered animals. Products from slaughtered animals include meat, offals, raw fats, fresh hides and skins. Products from live animals include milk, eggs, honey, beeswax and fibres of animal origin.

**Large farms:** are those which used to be included in the former "Scheduled Areas" less those which have been transferred for sub-division into settlement schemes. In large scale farming Counties namely, Nakuru, Uasin Gishu, Trans-Nzoia, Kericho, Nandi and Laikipia, the average size of farms is around 700 hectares. "Scheduled Areas" are lands that were formerly occupied by the "white settlers".

**Small farms:** include all other areas of arable farming covered in the surveys from which data set out in this Section are derived. Surveys covering the small farms areas started on a limited basis and have been gradually expanded so that they now cover all significant areas of arable farming. The small farms are between 0.2 and 12 hectares though there are some outside this range.

The data is reported on calendar year as opposed to seasonal basis. Therefore, for crops where planting and harvesting may take place more than once in the year, the production data is aggregated to get the annual data

<sup>1</sup>The three categories are defined as follows:

High potential: annual rainfall of 857.5mm or more (over 980mm in Coast region).

Medium potential: annual rainfall of 735mm-857.5mm.(735mm-980mm in Coast region and 612.5mm-857.5mm in Eastern region).

Low potential: Annual rainfall of 612.5mm or less.

## Environment

### Notes

This chapter covers statistics regarding Kenya's Environment and Natural resources. Conservation of natural resources such as water, land, soil, plants and animals have an impact on a wide range of industries including agriculture, forestry and fishing, mining and quarrying and tourism. The chapter provides information on forest cover, fish landing, mining and quarrying, wildlife population, annual rainfall by region and annual temperature by region.

#### Definitions

- **Dense Forest:** Lands with tree cover of canopy density of above 70% and above.
- **Moderate Forest:** Lands with tree cover of canopy density ranging from 40% to 70%
- **Open Forest:** Lands with tree cover of canopy density below 40%.

- **Wildlife population:** Estimates of the number of wildlife animals.
- **Rangelands:** This is the area used for grazing wild animals such as grasslands and bushlands.
- **Endangered wildlife:** These are animals at risk of extinction because of a sudden decrease in the population or loss of their critical habitat.
- **Meteorological region:** These are regions with homogeneous weather and climate. These regions have facilities with instruments and equipment to measure and record meteorological variables such as temperature and rainfall are located. The meteorological regions in Kenya are North Western, North Eastern, Western, Central Rift Valley, Central, Nairobi, South Eastern and Coastal.

**Meteorological regions** are regions with homogeneous weather and climate. These regions have facilities with instruments and equipment to measure and record meteorological variables such as temperature and rainfall are located

## Forests

## Energy

### Notes

**A**ccurate and timely energy statistics are critical to the design of transformative energy policies for Kenya. The tables in this chapter present energy statistics for the last ten (10) years ranging from generation/production, demand and supply and; import and export of energy products to the number of customers connected to electricity in the country.

#### Notes

Energy Statistics in the Statistical Abstract are compiled in line with the International Recommendation on Energy Statistics (IRES) and using the Standard Industrial Energy Classifications (SIEC) codes for the Energy Products.

#### Scope

The statistics presented cover Electricity generation and consumption together with consumption of fuel oils. A summary of the production, trade and consumption of Primary Energy is also presented at the end of the Energy Section.

#### Data Sources

Statistics collected from various institutions are primarily extracted from administrative data while Biomass energy demand is estimated from consumption patterns obtained

from various Censuses/Surveys undertaken by Kenya National Bureau of Statistics (KNBS).

#### Definitions

**Energy:** Heat and Power produced for use by Humans/ Machines from fuel commodities or Naturally occurring sources.

**Installed Capacity:** Maximum amount of electricity that can be generated if a given power plant operates at one hundred percent efficiency.

**Cogeneration:** Also known as combined heat and power, cogeneration is the simultaneous generation of electricity and heat in a heat engine or power station

**Transmission losses:** Electricity lost during transmission and distribution due to such factors as illegal connection or faulty lines.

**Fuel:** Substances burned as a source of heat or Power. The heat is derived from the combustion process.

**Biomass:** Fossil fuels taken from Natural resources which were formed from biological and geological processes.

**Energy Statistics in the Statistical Abstract are compiled in line with the International Recommendation on Energy Statistics (IRES) and using the Standard Industrial Energy Classifications (SIEC) codes for the Energy Products.**

## Electricity

# Manufacturing

## Notes

**Coverage:** - The information is based on Census of Industrial Production (CIP) conducted in 2018 as well as the Monthly Survey of Industrial Production (MSIP). The CIP covered all formal establishments in Kenya engaged in Mining and Quarrying; Manufacturing; Electricity, gas, steam and air conditioning supply; Water supply, sewerage, waste management and remediation activities. The MSIP collects data on quantities and values of output for products on a monthly basis.

The unit of enumeration is usually establishment rather than the enterprise. An establishment is an enterprise or part of an enterprise that is situated in a single location and in which only a single productive activity is carried out, or in which the principal production activity accounts for most of the value added. An enterprise is defined as an institutional unit with one or more establishments engaged in the production of goods and services. The enterprise and the establishment are the same for single-establishment firms. However, reporting at enterprise level is accepted if the respective establishments within a firm do not maintain independent books of accounts.

Currently the industrial statistics are classified using ISIC revision 4, in accordance with the international industrial recommendations.

### Definitions.

#### Quantum Index-

A quantum index measure the changes in quantity of

goods in physical terms such as number or weight. It gives the changes in quantity of goods produced for a specified period. The index is used for extrapolation in the absence of value indices. The base period for the index is 2017 obtained from the 2018 Census of Industrial Production data.

**Producer Price Index (PPI)** – Measures the changes in the output prices of goods sold by producers/manufacturers.

**Compensation of employees** – Compensation of employees is calculated on the basis of the annual Labour Enumeration Survey and includes wages and salaries in cash, wages and salaries in kind and employers' social contributions.

**Intermediate Consumption** – Consists of the value of goods and services that are used as inputs in the production process. It excludes the use of fixed assets and is valued at purchasers' prices i.e. the price that is payable by the purchaser.

**Output** - Output is sum of the total values of goods and service sold, bartered, used for payments in kind (including compensation of employees in kind), goods and services supplied by one establishment to another belonging to the same enterprise and changes in inventories of finished goods and work-in-progress.

**Value Added.** – Value added at basic prices is the difference between output and intermediate consumption.

**An establishment is an enterprise or part of an enterprise that is situated in a single location and in which only a single productive activity is carried out, or in which the principal production activity accounts for most of the value added**

# Construction

## Notes

**C**onstruction statistics comprise of new construction work, repair, additions and alterations, the erection of prefabricated buildings or structures on the site and also construction of a temporary nature done within the reporting period"

**Building statistics** are compiled from data collected on building plans approved and buildings completed (private and public) from County Governments. This is in form of new buildings, alterations and extensions of existing buildings during the reporting period.

**Residential buildings** are those buildings where more than half of the floor area is intended for dwelling purposes. Examples include single-family houses multi-family buildings, including high-rise buildings"

**Non-residential buildings** are all other buildings which are not classified as residential and not intended for dwelling purposes eg buildings for industrial production, {factories, workshops, assembly plants} hospitals, schools, office buildings, hotels, stores, shopping malls, restaurants, airport buildings, indoor sports facilities, parking garages, including underground parking garages, warehouses, religious buildings

**Large construction projects** typically will have a longer duration exceeding the reporting period, valuation of such projects depends on progress made and value is taken for the work done within the reporting period.

Large construction projects typically will have a longer duration exceeding the reporting period, valuation of such projects depends on progress made and value is taken for the work done within the reporting period

\* Provisional

Some road classes will be classified to a higher class after construction and upgrading

A superhighway (S)-Highway connecting two or more cities/towns meant to carry safely a large volume of traffic at the highest legal speed of operation.

International Trunk Road (A) -Roads forming strategic routes and corridors, connecting international boundaries at identified immigration entry and exit points and international terminals such as international air or sea ports.

National Trunk Road (B) - Roads forming important national routes, linking national trading or economic hubs, County headquarters and other nationally important centres to each other and to the national capital or to Class A roads.

Primary Road (C) - Roads forming important regional routes, linking County headquarters or other regionally important centers, to each other and to Class A or B roads. Required to collect regional and local traffic and channel it to class A and B roads.

Secondary Road (D) - Roads linking constituency headquarters, Municipal or Town Council Centers and other towns to each other and to higher class roads. Required to collect local traffic from lower class roads and channel it to the higher class roads.

Minor Road (E)- Major Feeder Roads linking important Constituency centres to each other and meant to carry local traffic and to channel it to class D roads.

Special Purpose Roads (F) -Provide direct access to individual or group of properties, and residential areas, or to places of specific social or economic activity, including industrial and commercial areas and government institutions such as National Parks, schools, hospital, prisons and government housing.

## Tourism

### Notes

**V**isitor Statistics: Data on visitors to Kenya, as recorded by the Immigration Service under the Kenya Citizenship and Immigration Act of 2011, provides insights into the inflow and outflow of people. This data, captured by the PISCES system, includes the number of arrivals, departures, and the purpose of visits.

#### Visitor Categories:

**In-transit Pass:** For those passing through Kenya, valid for up to one week. Not required for direct transits, aircraft crews, or cruise ship day visitors.

**Visitor's Pass:** Valid for up to six months with possible extensions to twelve months, catering to business professionals and tourists.

**Special Pass:** Valid for up to three months.

**Length of Stay:** Measured from arrival to departure, the length of stay statistics may underrepresent the actual time spent by visitors due to multiple visits by individuals.

#### Hotel Occupancy Statistics are classified across major zones and their subdivisions:

**Nairobi:** Divided into 'High Class' and 'Other' accommodations.

**Beach Zone:** Covers the coastal strip, with sub-zones like

South of Likoni (South), Nyali Bridge to Mtwapa Bridge (North Mombasa), Mtwapa Bridge to Malindi Point (Kilifi/Watamu), and Malindi Point to Kiunga including islands (Malindi/Lamu).

**Mombasa:** Encompasses the island itself.

**Coast Hinterland:** Includes the Coast Region minus the coastal strip, Kitui County, Taita-Taveta County, and Kwale County, with distinctions between East and West based on the Mombasa-Tsavo Road.

**Maasailand:** Features East (Kajiado County and parts of Machakos County) and West (Narok and Transmara Sub-Counties).

**Nyanza Basin:** Constitutes the Nyanza Region and Kericho County.

**Western:** Spans Western Region, Nandi, Uasin Gishu, Trans-Nzoia, West Pokot, Elgeyo Marakwet, and Baringo Counties.

**Central:** Includes Nakuru (town and lake), Naivasha (town and lake), Mount Kenya (Embu, Kirinyaga, Laikipia Counties, and parts of Meru County), Aberdares (West of the Karatina-Naro Moru Road in Nyeri, Nyandarua, and Muranga Counties), and the Periphery (Southern Samburu and western Isiolo Counties).

**North:** Covers the North Eastern Region, Marsabit County, Turkana County, eastern parts of Isiolo County, and northern parts of Samburu County.

Data on visitors to Kenya, as recorded by the Immigration Service under the Kenya Citizenship and Immigration Act of 2011, provides insights into the inflow and outflow of people. This data, captured by the PISCES system, includes the number of arrivals, departures, and the purpose of visits

## Transport and Storage

### Notes and Definitions

#### Railway Transport

Statistics on the operation of the Railways Corporation relating to: Traffic carried; Kilometres of lines open for Traffic; and Stocks of transport equipment are derived from the Annual Report of the Corporation

#### Ports Statistics

As in the case of the Railways, statistics on Kenya Ports Authority relating to revenue and expenditure are derived from the annual report of the Authority. Consequently, as noted above the definition expenditure differs from the "economists" definition used elsewhere in this Abstract.

#### Shipping

- (a) Statistics relate to both steam and sailing ships engaged in international or coastwise trade, arriving either with cargo or in ballast. A tug with lighters in tow is counted as a single steamship with a tonnage equal to the combined tonnage of the tug plus the lighters. Naval craft are not included.
- (b) The data is sourced from the following ports in Kenya; Mombasa, Malindi, Lamu, Kilifi Shikoni and Kisumu. Each call at a port is counted separately:

#### Air Traffic

- a) All international scheduled services are operated from Jomo Kenyatta International Airport (Nairobi), Moi International Airport (Mombasa) and Eldoret International Airport, while Wilson Airport and Kisumu International Airport operate international non-scheduled commercial services only.
- b) Air Force/Military, Police, training, testing and private aircraft movements are not recorded.
- c) Transit passengers are included once in the total number of passengers handled as from 1970.
- d) Passengers in transit are those expected to continue their journey either in the same aircraft or in another after a brief stopover.
- e) Passengers landing or embarking are mainly those completing or commencing their journey, but the statistics do include a small number of those changing aircraft or staying over for a few days.
- f) Freight handled is weight of cargo and mail unloaded from or loaded into aircrafts. It does not include aircraft fuel or stores or goods remaining in the aircrafts.
- g) Movements - Each touchdown and take-off is counted as a separate movement.

**Statistics relate to both steam and sailing ships engaged in international or coastwise trade, arriving either with cargo or in ballast. A tug with lighters in tow is counted as a single steamship with a tonnage equal to the combined tonnage of the tug plus the lighters. Naval craft are not included**

- h) 1 kilogram (kg.) = 2.205 lb., 1,000 kilograms = 2,205 lb.  
= 1 Metric Tonne.
- i) For the purpose of direction of air traffic, countries of origin and destination of the aircraft have been grouped into regions, in order to avoid disclosing the operations of individual companies. The countries included in each region are as follows:-

- (1) North America – United States
- (2) United Kingdom - includes Ireland.
- (3) Continental Europe - Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, Germany, Greece, Hungary, Italy, Luxembourg, Netherlands, Norway, Poland, Romania Spain, Sweden, Switzerland, Bosnia, Croatia, Slovenia, Serbia, Macedonian, Russia
- (4) Middle East - Cyprus, Egypt, Iran, Israel, Lebanon, Syria, Turkey.
- (4) Arabian Peninsula, Pakistan and India - Aden, Bahrain, Sri Lanka, India, Kuwait, Oman, Pakistan, Saudi Arabia, and Yemen.
- (5) Africa North of the Equator (excluding Egypt) - Algeria, Cameroon, Central African Republic, Chad, Dahomey, Ethiopia, Gabon, Ghana, Ivory Coast, Libya, Mali, Mauritania, Morocco, Nigeria, Senegal, Sierra Leone,

- Somalia, Sudan, Togo, Tunisia, and Upper Volta.
- (6) Africa South of the Equator and Adjoining Islands - Angola, Congo Brazzaville, Malagasy (Madagascar), Mauritius, Malawi, Mozambique, Reunion, Republic of South Africa, Zimbabwe, D.R.C and Zambia.

#### Roads:

The Kenya Roads Board (Formerly called Roads Department) completed the road reclassification in 1970. From 2018, update on classification of roads is informed by the Roads Inventory Conditions Survey (RICS). All roads in Kenya now fall under one of the following categories: -

- A - International Trunk Roads - Link centres of international importance, and crossing international boundaries or terminating at international ports.
- B - National Trunk Roads - Link nationally important centres.
- C - Primary Roads - Link locally important centres to each other and to higher-class roads.
- D - Secondary Roads - Link locally important centres to each other and to higher class roads.
- E - Minor Roads - Any link to a minor centre.
- F - Special Purpose Roads - Include Parks, township, agriculture, fish and strategic roads.

# Information and Communication Technology

## Notes, Definitions and Coverage

The 2023 Statistical Abstract Report provides an in-depth look at the Information and Communication Technology (ICT) sector's economic contributions from 2015 to 2022. It examines the sector's economic output, the costs of inputs consumed, and the net value added to the economy.

**Telecommunication Services:** The sector encompasses both fixed-line and mobile services, with capacity indicating potential connectivity and connections reflecting actual service usage. Mobile telephony has shown substantial growth with increased mobile telephone capacity and active connections, indicating higher mobile penetration.

**Mobile Money:** The increasing mobile money sector is represented by the number of agents and subscribers, alongside the monetary volume transacted through these services. The total deposits and transfers via mobile money agents signify the expanding role of mobile financial services.

**International and Domestic Communication Traffic:** This includes all forms of telephone traffic, both international (outgoing and incoming) and domestic (across various

telecommunication mediums). Roaming services are also accounted for, reflecting the activity of home subscribers abroad and foreign subscribers domestically.

**Internet Service Provisioning:** This area captures the landscape of licensed internet service and application service providers, detailing the split between wireless and wired internet subscriptions. It encompasses terrestrial mobile data, wireless data, and satellite data subscriptions, along with wired internet services through cable modems, fibre optics, and DSL connections.

**Broadband Services:** Broadband capacity and subscriptions are segmented by undersea, satellite, and total bandwidth capacities. Utilized bandwidth reveals the extent to which these capacities are in operation. Subscriptions are further categorized by fixed, satellite, terrestrial wireless, and active mobile broadband services.

**Media and Transmission Frequencies:** TV and FM frequencies are vital for broadcasting services, while mobile transceivers are pivotal in mobile communication, divided into generations from 2G to 5G. The total count of transceivers highlights the infrastructure's evolution and capacity.

The increasing mobile money sector is represented by the number of agents and subscribers, alongside the monetary volume transacted through these services. The total deposits and transfers via mobile money agents signify the expanding role of mobile financial services

**Table 14.1:** Value of Output, Intermediate Consumption and Value added from the ICT Sector, 2015-2022

Year	Output	Intermediate Con- sumption	KSh Million	
			Value Added

<sup>1</sup>Electronic calculating machines, cash registers, accounting machines, postage-franking machines, ticket issuing machines, reproducing and displaying machines with calculating functions,  
duplicating machines and their parts/accessories etc

<sup>2</sup>For office machines and data processing machines

<sup>3</sup>Include Television sets, decoders etc

<sup>4</sup>Whether or not combined with sound recording or reproducing apparatus or a clock

<sup>5</sup>Sound recording, video recording or reproducing apparatus including or not including a video tuner  
<sup>6</sup>Such as computer, laptops, networking equipments etc plus their parts and accessories such as telephone sets, microphones, electric sound amplifier sets Television cameras, digital or video cameras recorders, radio or tv transmission apparatus etc

## Education and Training

### Notes

#### Coverage

The statistics in respect of primary and secondary schools' enrolment refer to total number of learners for each year. The statistics cover all schools, i.e. both public and private. Data on teachers training institutions includes public and private institutions for pre-primary, primary and secondary (diploma) teachers training colleges. Data on higher education consists of enrolment at the Universities of Nairobi, Moi, Kenyatta, Egerton, Maseno, Eldoret, Technical University of Kenya, Technical University of Mombasa and Private Accredited Universities.

#### Definitions

**Public schools:** Schools that are sponsored or funded by the government or a government agency, such as the Ministry of Education or Department of Education.

**Private schools:** Schools that are owned, managed and funded by private individuals, organizations, foundations or companies. They do not receive government funding and often charge tuition fees to cover operational costs.

**Professionally qualified teacher:** A teacher who has either attended a teacher training college and has been awarded a teaching certificate or is a graduate with a bachelor's degree in education or a degree in any other discipline and a teaching diploma.

**Private candidate:** Any person registered as an examination candidate who immediately before registration was not enrolled as a pupil/student in an educational institution.

Data on higher education consists of enrolment at the Universities of Nairobi, Moi, Kenyatta, Egerton, Maseno, Eldoret, Technical University of Kenya, Technical University of Mombasa and Private Accredited Universities

## Health and Vital Statistics

### Notes

#### Health Statistics

The health statistics presented cover the number of operational health facilities by level, type and ownership, the registered medical laboratories by class and county, the registered health personnel by cadre and outpatient morbidity for persons under 5 and those 5 or more years of age by county.

**Medical laboratories:** Classification of laboratories from 'B' to 'F' depends on the type of disease/ nature of disease being tested, the nature of the specimen being handled by the laboratory (the higher the level, the higher the specialty of the tests) and competence of the personnel. The category of "Unclassified" represents laboratories awaiting registration and/or subsequent classification from the Kenya Medical Laboratory Technicians and Technologists Board.

**Outpatient morbidity:** The number of times a client visits a health facility for treatment without spending the night (being admitted) in that facility.

#### Vital Statistics

These are statistics pertaining to important events in human life such births, marriages and deaths. They include relevant characteristics of the events and the person(s) of concern.

**Birth Weight:** Birth weight is the first weight of a foetus or newborn obtained immediately after birth. Underweight babies are those born with a birth weight less than 2,500 grams (UN Principles and Recommendations for a Vital Statistics Rev 3). This information is vital in examining pregnancy outcomes as low birth weight is closely associated with neonatal mortality as well as morbidity and mortality amongst infants.

**Gestational Age:** Gestational age of a newborn or dead foetus is the elapsed time measured from the first day of the last menstrual period of the mother to the date of delivery expressed in completed days or weeks. Preterm babies are those born before 37 completed weeks of gestation (UN Principles and Recommendations for a Vital Statistics Rev 3). This information coupled with information on birth weight is important in providing a deeper insight into the known effects of low birth weight and preterm births on neonatal and infant morbidity and mortality.

**Still Birth/Foetal Death:** A stillbirth is an infant born after 24 or more weeks completed gestation and which did not, at any time, breathe, move or show signs of life. It is a general recommendation that statistics on still births be presented alongside those on live births. Statistics pertaining still births, birth weight and gestation age presented

The health statistics presented cover the number of operational health facilities by level, type and ownership, the registered medical laboratories by class and county, the registered health personnel by cadre and outpatient morbidity for persons under 5 and those 5 or more years of age by county.

in this chapter are for births occurring in a health facility. Furthermore, in some instances the gestational age may be unknown and birth weight may not be recorded.

**Infant Mortality Rate (IMR):** Deaths of children under one year of age per 1,000 live births.

**Under Five Mortality Rate (U5MR):** Deaths of children under 5 years of age per 1,000 live births.

**Maternal Mortality Ratio (MMR):** Deaths during a given year among women while pregnant, during delivery or within 42 days of termination of pregnancy but not from incidental causes, per 100,000 live births.

**Crude Death Rate (CDR):** Number of deaths occurring from all causes in a given population during in a year per 1,000 population.

\* Provisional

<sup>1</sup>Class 'B' is the lowest while class 'F' is the highest.

<sup>2</sup>Classification of laboratories depends on;

<sup>3</sup>The type of disease /nature of disease being tested

<sup>2</sup>The nature of specimen being handled by the lab(the higher the level,the higher the speciality of the tests)

<sup>3</sup>Competence of the personnel

## Social and Economic Inclusion

### Notes

**G**ender: a socio-cultural construct of the society that determines and identifies roles or functions, entitlements and deprivation of women and men, and girls and boys in the society. Gender classification changes with time, space and needs of a society.

**Sex:** a biological identification of females and males based on their physiological characteristics.

**AGPO:** Access to Government Procurement Opportunities. The programme requires that all public procuring entities to reserve a minimum of thirty per cent of their annual procurement spending for award to Youth, Women and Persons with Disability (PWDs).

**Public Procurement:** the purchase of goods, services and works by, for or on behalf of a public authority, such as a government agency.

**Procurement entity:** a ministry, or department or subordinate office of or autonomous body controlled by the Government. Public procurement entities include; Ministries/State Departments, State Corporations, Commissions and Independent Offices, Universities and Colleges, Counties, Executives and County Assemblies.

**County Executive Committees Members (CECM)** implements the laws that the County Assembly passes and ensures compliance from the various county departments. The County Executive Committee Members are appointed by the county Governor with the approval of the county assembly.

The County Executive Committees Members (CECM) implements the laws that the County Assembly passes and ensures compliance from the various county departments. The County Executive Committee Members are appointed by the county Governor with the approval of the county assembly
